Education

Aliah University Expected Graduation: 2027
Bachelor of Technology (B.Tech) in Computer Science & Engineering *Kolkata, India*

- **Current CGPA: 7.91 / 10.0** (upto 6th semester)
- **Relevant Coursework:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Experience

Indian Statistical Institute (ISI) June 2026 – July 2026
Research Fellow / Summer School Intern | *Certificate* *Kolkata, India*

- Selected for the 11th Summer School on CV, Image Processing, ML, and Vision-Language Models at ISI Kolkata
- Researched and built deep learning and NLP architectures, exploring Transformer-based contextual embeddings and semantic retrieval
- Collaborated with research faculty to design algorithmic ranking mechanisms and automated keyword extraction pipelines

Projects

NoBidFreelance | *Source Code* **React | Node.js | Express | PostgreSQL | Prisma**

- Developed a full-stack platform designed to eliminate bidding friction and connect clients with verified developers directly
- Implemented stateless RESTful API endpoints with JWT authentication and middleware for secure, role-based endpoint authorization
- Modeled relational PostgreSQL schemas and utilized Prisma ORM for type-safe database queries, migrations, and transactional integrity

AI GYM App | *Source Code* **Python | OpenCV | MediaPipe**

- Built an intelligent computer vision application to dynamically monitor workout routines and track exercise forms in real-time
- Integrated pose estimation machine learning models to accurately calculate joint angles and automate repetition counting
- Engineered a responsive user interface to provide immediate visual feedback and posture correction alerts during active sessions

Real-Time Chat App | *Source Code* **React | Node.js | Socket.IO | MongoDB**

- Developed a low-latency chat application featuring secure user authentication, online status indicators, and instant messaging
- Implemented bidirectional, event-driven communication pathways between the client interface and server using WebSockets
- Designed resilient NoSQL database schemas to persistently store chat histories and seamlessly manage concurrent user sessions

Medhavi Educare | *Website* | *Source Code* **React.js | Tag Manager | Search Console**

- Architected, built, and shipped a live production client portal enabling students to explore international university admissions criteria
- Engineered modular React components to optimize rendering performance, reducing page load latency and ensuring mobile responsiveness
- Integrated structured SEO metadata, search indexing pipelines, and event tracking via Google Search Console & Tag Manager

Technical Skills

Languages: JavaScript, Python, Java, SQL, HTML5, CSS3
Backend & Databases: Node.js, Express.js, PostgreSQL, MySQL, Prisma ORM, RESTful APIs, JWT Auth, Microservices
Frontend & Web: React.js, Responsive Web Design, Component Architecture, State Management, DOM APIs
Tools & Frameworks: Git, GitHub (Pull Requests, Code Reviews), Postman, PyTorch, Hugging Face, Linux/Unix, Tag Manager
Core CS Concepts: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, System Design Fundamentals
